## Insurance Authorization

It is understood that the undersigned patient is eligible for benefits under this plan. Any quote of benefits is just an estimate provided to us by your insurance company. Payment will not be determined until the claim is received. Therefore, we are unable to guarantee any quote of benefits. In the event the patient is not eligible for coverage, has not met their deductible, insurance does not pay as expected, or the insurance company does not pay as expected, or the insurance company does not respond within 30 days of submitting the claim the patient or responsible party is ultimately responsible for any unpaid balance. There will be an additional fee of \$20.00 for any claim we have to turn over to our collection agency.

## Contact Lens Policy

Most insurance companies cover a **Standard Eye Examination** only. This includes an assessment of the overall health of the eye and a prescription for glasses.

**Examination for contact lenses is generally not covered by most insurance companies**, and the following additional tests are necessary in order to determine a precise fit and proper contact lens prescription and to determine the eye's ability to safely wear contact lenses.

- Assessment and health of your cornea.
- Training of insertion and removal for new wearers.
- Keratometry – measures the central curve of the eye – needed to determine lens shape, size and power.
- Slit lamp biomicroscopy – microscopic evaluation of the front of the eye to rule out any conditions that could interfere with lens wear such as infection, allergies, inflammation or scarring.
- Tear volume and tear quality assessment.
- Examination with your present contact lenses.
- Determination of the contact lens prescription – different from the glasses prescription; the power needed in the lens to provide maximum vision.
- Contact lens design and analysis of the fit – evaluation of the lens on the eye to ensure a healthy fitting relationship; specifically, proper centration and movement when blinking.

There is an additional professional fee for the contact lens evaluation and fitting. The fee varies depending on the complexity of the prescription, the type of contact lens and the services necessary for the most optimal fit. The contact lens fitting fee includes all necessary follow up visits relating to the initial contact lens fitting for a 3 months period. Once the contact lens prescription is released to you, and if you choose to purchase the prescribed contact lenses from an outside source (**not** our office), you are then legally released from our care and there will be a charge for subsequent contact lens follow up visits.
